FOOD

Wood processing machinery performs many unique and difficult applications. Volta Belting Technology has the product range, experience and technologies to provide solutions for these machine-based applications.

The product range includes:

- 1524 mm/60" wide flat belts on cutting & gluing lines and for general transporting in the wood industry.
- White Volta Power® Transmission belts for applications requiring high grip and non-marking characteristics.
- Belt coatings for flat wide belts, profiles and timing belts.
- Belts for specific use machines such as edge banders and tenoners.
- Roller coating sleeves.

Volta Power® in the Wood Industry

The Volta Power® product line includes belts specially designed for wood processing machinery produced from white colored Thermoplastic Rubber (TPR) that combines the performance properties of Thermo set rubber with the capabilities of the Thermoplastics' processing equipment. Compared to rubber, TPR gives a better quality final product with superior dimensional accuracy.

Our unique computerized production system enables us to manufacture standard or non-standard power transmission belts in any length up to 70 meters without minimum quantities and shipping within days.

➤ Typical (Machine) Applications

Double-end tenoners and edge banders are designed for high-speed processing of panel shaped workpieces such as :

- direct coated panels
- core board
- plywood
- MDF
- solid wood
- plastics
- hard foam
- cork
- post forming or cement-bonded fiber

This work requires a belt that will firmly grip any material used without marking the final product.

➤ Typical Machines

• HOMAG
• STEFANI

• BIESSE
• IDM

• IMA
• CELASCHI

• HOLZ-HER
• NARDELLO

Volta Power® for the Wood Industry Products

Classical Power Belt with Smooth Top

Sections	A	B	20	C	25	D
Width (~)	13	17	20	22	25	32
Height (~)	11	14	15	17	19	23
Min. Pulley (mm)*	80	140	180	200	280	400

Classical Power Belt with ITO (Impression Top Oval) & Waffle Top

Sections	A	B	20	C	25	D
Width (~)	13	17	20	22	25	32
Height (~)	11	14	15	17	19	23
Min. Pulley (mm)*	80	140	180	200	280	400

Classical Power Belt with Roof Top

Sections	D/32
Width (~)	32
Height (~)	23
Min. Pulley (mm)*	400

Banded Belt with Waffle & Smooth Top

Volta Power® produces a line of special white banded belts. The belts are available with smooth, soft top (PKR0) or with waffle top (PKR2). These belts are designed to be used on processing machinery requiring a belt that is non-marking and has high grip. In addition, the belt provides excellent strength and carrying capacity.

The benefits of the banded belts are:

- increased transmission efficiency
- reduced maintenance cost
- eliminates belt twisting and reduces whipping
- ensures even belt tension

Special Wood Products:

Special Dimension Belts with Waffle Top

Sections		
Dimensions	48x15	50x20
Min. Pulley (mm)*	140	200

Special Banded Belt

Dimensions	62x18	67x17	70x17	75x17
Min. Pulley (mm)*	200	200	200	200

Classical, narrow, banded and conveyor belts are also available in white.

Industrial Grade Flat Belts in the Wood Industry

The Volta General Conveyor Belting line is manufactured from Thermoplastic Elastomer (TPE) material with unique homogenous characteristics. These belts are most suitable for conveying wood and are available in a wide range of colors, thicknesses, hardnesses and surface textures. Quality thermo-welded fabrications are custom-made to suit your specific needs perfectly.

Standard Belt Width = 1524mm /60".

- ✓ High carrying capacity with excellent grip.
- ✓ Soft, non-marking belts treat the product conveyed with extreme care.
- ✓ The belts absorb the impact of the falling products well ensuring long life.
- ✓ Resistant to chemical action from moisture, paints and other compounds and resistant to glues adhering to the belt surface.
- ✓ The belt materials' flexible character is highly resistant to abrasion and inhibits surface cuts from spreading.
- ✓ Homogeneous smooth surface does not crumble or crack (as seen in rubber belting).
- ✓ Reinforced - bottom belts used to prevent elongation on very long conveyors.
- ✓ Quick and easy to repair and to make endless with Volta thermo welding tools.

Recommended Applications

Belt Type	Color	Shore Hardness	Thickness mm	Industry	Application	Reinforced	Non-Marking	Grip	Resists Paints & Glues	Quick Splice & Repair	Resistant to Abrasion
FRL		80A	2	Wood Flooring	Dimpter of Graycon Sorters	✓	✓	high	✓	✓	✓
			3	Melamine Cabinet Manufacture	Transfers						
			5	Plywood	Skinner Saws, Trim Saws, Jumper Belts, Inclines

			4	Plywood	Veneer Stackers, Jumper Belts, Putty Lines						
FRG		95A/46D	2	Plywood	Set of Narrow Spaced Belts	✓	✓	medium	✓	✓	✓
			3		Alignment Belt						
FK		59D	3	Saw Mill	Out Board Transfer Belts	✗	✓	low	✓	✓	✓
			4	Raw Timber	Feeding Belt						
FRPZ		86A	3	Floor Lamination	Feeding Belt	✓	✓	high	✓	✓	✓

Roller Coating Sleeves

Volta Sleeves have an abrasion resistant, soft, non-marking surface that is ideal for coating rollers. Using Volta proprietary tools, the sleeves are easily mounted without lubricants or glues. Sleeves are available with a smooth surface and in dimensions from 12 mm O.D. to 95 mm O.D.

Belt Coatings

A wide range of heat-welded coatings can be applied to achieve extra grip and added protection against forceful impact of falling wood.
